## About our Data Protection team

Organisations of all sizes struggle with the increasing regulatory pressure on the access and use of information. The laws relating to the collection and use of personal data have changed enormously over the last decade, and few organisations can be certain they are fully compliant.

Working with a network of specialist lawyers across all major jurisdictions across the world, we are equipped to handle not only highly specialist issues in foreign countries, but also the largest compliance projects, as well as advise on how regional differences in laws may affect your business. We also advise on best practice and industry norms in achieving compliance with data protection laws, security standards and industry guidelines.
